Project abstract:

This research project investigates wellbeing, self-oriented and prosocial behaviour among adolescents and students in Rotterdam, the Netherlands during the pandemic COVID-19 crisis. This project consists of two major components: 1) a sub-project focusing on EUR (Erasmus University Rotterdam) students and 2) a sub-project focusing on adolescents living in the Rotterdam area. For both projects, participants were asked to report on their wellbeing, experiences and behaviors during the pandemic COVID-19 crisis on Mondays - Fridays, for two consecutive weeks (i.e., in the form of daily diaries). After completion of the first measurement wave in May 2020 (T1), the same participants were invited for the second measurement wave in November 2020 (T2). The larger project is expected to result in several research articles, that all answer different research questions. In these articles, research questions will be answered for the students and adolescents separately.

Wellbeing Project During COVID-19 - General

General

Please tick the following boxes if you agree to act according to the following terms:

- I will check and, if necessary, update my data management plan a minimum of once a year
- I will discuss the data management plan with my research team
- I will answer all questions truthfully and to the best of my knowledge

Support in writing a data management plan is available through the faculty Data Stewards. If your faculty has no Data Steward, support is available through the Research Data Management Specialist of the Erasmus Data Service Centre (EDSC is part of the University Library). Which research support professional is available for you?

- Data Steward of my own faculty - ESSB

Scientific research must be conducted in line with existing guidelines on good research practices and integrity.

Please select which guidelines you are familiar with.

- The European Code of Conduct for Research Integrity (ALLEA, 2017)
- The Netherlands Code of Conduct for Research Integrity (VSNU, 2018)
